Election/Restrictions

Claims 4,7,9,14-23,26 and 28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/4/05.

Claim Rejections - 35 USC § 112

Claims 24,25,27 and 29-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 24, a cord guide and cord lock are recited. However, later in the claim, the cord is recited in a positive manner, as in "the first inner surface slidably engaging at least one lift cord". It is not clear if the cord guide and lock are being recited alone or in combination with the cord. For examination purposes, it is assumed that the cord is not being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24,32 and 33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Matsushima et al.

Art Unit: 3634

Channel/throughbore 4 has first and second inner surfaces. See slot 5 having a wide portion and a narrow portion defined by portions 6. The term "decorative" is subjective and reads on any portion of the body 2.

Claims 24,25 and 29-33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ford et al.

Ford discloses 4 sides, all of which have channels/throughbores, such as 28,31, the open top and open right side (as seen in Fig. 5), all of which are "capable" of slidably engaging a cord, with the lower opening having the third surface in the form of the cord lock member 52. The slot defined between the pulley 22 and the roller 52 is adjustable between less and more cord gripping positions.

Allowable Subject Matter

Claims 1-13 are allowed.

Claim 27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

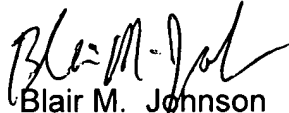

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
